

Week 5 Submission Report

Student: Akshay

Project: Backend Development - Phase 2 Week 5

Objective

Develop a Product Management CRUD API using Express.js, SQLite, and JWT authentication.

Tasks Completed

- Created products table using migration.
- Implemented Product Model.
- Implemented Product Controller.
- Created Product Routes.
- Connected routes in app.js.
- Protected Product API using JWT middleware.
- Tested Create, Read, Update and Delete operations with Thunder Client.
- Updated README.md.
- Created docs/products.md.

API Endpoints

POST /api/products
GET /api/products
GET /api/products/:id
PUT /api/products/:id
DELETE /api/products/:id

Result

All Week 5 requirements were implemented and verified successfully.
